

12. A terminal, comprising:

an input block;

a display device;

CK
a graphical user interface displayed on said display device and responsive to instructions from said input block to add encrypted certification information and a control command to electronic mail, wherein said control command is selected by a user of said predetermined electric device and indicates a manner in which said predetermined electric device will operate after said predetermined electric device is activated; and

a modem for transmitting said electronic mail through a network to said predetermined electric device.--

In the Drawings

Applicant respectfully requests the Examiner to approve the proposed changes to the drawings which are noted in the following paragraphs. A copy of the Letter to Official Draftsperson is attached, with a copy of the proposed drawing changes shown in red ink.

In FIG. 10, to the right of the figure representing step S55, please change "YES" to --NO--;

In FIG. 10, below the figure representing step S55, please change "NO" to --YES--; and

In FIG. 13B, please change the text describing step S78 to read as follows: --SEND ELECTRONIC MAIL INDICATING THAT SPECIFIED RESERVATION DATA HAVE NOT BEEN FOUND--.
